

IVO Hosted Solution

Big Business Communication for a Small Price

In a small company, good communication with customers and suppliers is critical. But most small businesses can't afford to buy or maintain expensive phone systems. IVO has the perfect solution. Our IVO system is easy on the wallet, but it has all the features of a high-priced systems. With our IVO system, you're not getting a small PBX with limited capabilities. Instead, you're sharing a feature-rich, high-end PBX at a very low cost. Here are some of the things you can do with the IVO service.

Reduce costs

With no hardware or software to maintain, you save cost in many ways. There is no big capital outlay for a new system. You don't have to hire and train someone to do phone support. You get all the high-end features you need without paying extra, and you don't need to hire a receptionist to answer incoming calls. Our IVO system does it for you.

Get a professional presence

You can greet your callers with a custom, professional business greeting every time they call. Let your customers talk to an actual receptionist and not a recording. Advanced features like

ACD queuing will handle the calls efficiently, ensuring minimum wait times and correct routing.

Distribute your workforce

With an IVO system, you can route incoming calls to any type of phone, anywhere. This lets your employees work from the office, from home, work sites, or on the road. Try doing that with a typical small business PBX. You can even move to a completely "Virtual" office, eliminating the expense of office rent.

Pay as you grow

Small businesses often start with a small PBX and have to buy new systems as they grow or else they pay too much up-front, trying to make sure their system will be big enough to handle future growth. Our IVO system lets you start as small as you want and grow to unlimited size, while only paying for what you need.

Never ring busy

With a traditional PBX you often have to buy extra phone lines just to keep callers from hearing a busy signal. IVO customers just make sure every employee has a working phone (cellular, land line, or VoIP) and never worry about ringing busy. We will automatically allocate more lines to your business whenever you need them.

Conference without hassles

Get employees, clients, and/or suppliers together without messy scheduling or a complex reservation system. Every IVO service includes integrated, hassle-free conferencing up to 64 people.

If it rings, dings, or pings;
we can fix it!
